Education

Gokaraju Rangaraju Institute of Engineering and Technology

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.00/10

Aug 2023 – Jun 2027

Hyderabad, India

Technical Skills

Programming Languages: Python, C++, C, JavaScript, SQL

Frameworks: Django, FastAPI, React.js, TensorFlow

Databases: PostgreSQL, MySQL

Web Technologies: REST APIs, HTML, CSS

Tools: Git, GitHub, Linux, VS Code

Core Subjects: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Projects

AI-Powered Medicinal Plant Identification System | TensorFlow, Python, HTML, CSS, JavaScript |

- Trained an InceptionV3 deep learning model using transfer learning and data augmentation, achieving approximately 92% classification accuracy across 150+ medicinal plant species.
- Built an intelligent medicinal knowledge base mapping plants to diseases, medicinal uses, preparation methods, and botanical information.
- Developed a responsive web application enabling users to upload plant images and receive real-time classification results with medicinal recommendations.
- Optimized inference pipeline to deliver predictions in under 500 ms while maintaining high accuracy.

CarZone — Full Stack Vehicle Marketplace | Python, Django, PostgreSQL, HTML, CSS |

- Designed and implemented a scalable Django backend following the MVC architecture with RESTful endpoints for vehicle listings and inquiry management.
- Developed a normalized PostgreSQL database schema supporting efficient filtering, searching, and management of thousands of vehicle records.
- Implemented optimized database queries and indexing strategies to improve search performance and application scalability.
- Built a responsive frontend providing an intuitive user experience for browsing, searching, and managing vehicle listings.

Quiz App | HTML5, CSS3, JavaScript, REST API |

- Built an interactive browser-based quiz application that dynamically fetches categorized questions from the Open Trivia DB API across configurable difficulty levels and question counts.
- Built secure RESTful APIs using FastAPI and implemented JWT-based authentication for protected user sessions.
- Implemented an adaptive countdown timer (20s/15s/10s based on difficulty), real-time answer feedback, and a progress bar to enhance user experience.
- Persisted user high scores using browser localStorage and deployed the app on Netlify with a live production URL.

Achievements

- Solved **700+** **Data Structures & Algorithms problems** across LeetCode, CodeChef, and other competitive programming platforms.
- **LeetCode Contest Rating: 1623**
- **CodeChef Rating: 1528**
- Strong foundation in Algorithms, Data Structures, Dynamic Programming, Graphs, Trees, Binary Search, and SQL.

Certifications

- **Smart Coder** – Smart Interviews (Data Structures, Algorithms & Competitive Programming)
- **Problem Solving (Intermediate)** – HackerRank
- **SQL (Intermediate)** – HackerRank
- **Python Essentials 1** – Cisco

Languages

English (Fluent), Hindi (Fluent), Telugu (Native)
